Key Vocabulary

adult	A fully grown animal or plant.
develop	To grow bigger and become stronger.
life cycle	The changes living things go through to become an adult.
offspring	The child of an animal.
young	Offspring that has not reached adulthood.
live	Offspring that has not hatched from an egg.
exercise	A physical activity to keep your body fit.
hygiene	How we keep ourselves and the world around us clean so we can stay healthy and stop germs.

Core Four

3

All **young** animals change as they go through the different stages of their **life cycle** and grow into **adults**.

To stay alive, all animals have three basic needs for survival: air, water and food.

To grow into a healthy adult, we must eat the right types of food and **exercise**.

To stop germs from spreading, it is important to be **hygienic**.

SCIENCE

1

Animals including humans

Key facts

4

- Some animals give birth to **live young**.
- Some lay eggs, which the **young** hatch from.
- Young animals then develop into **adults**.
- Some **offspring** look like their **adult** when they are born.

- Some **offspring** do not look like their **adult** when they are born.
