

Daily Learning Task 2

Year 4

Maths

Angles can be found between the point where 2 lines meet. We can describe them as a right angle (90 degrees), acute (less than 90 degrees), obtuse (more than 90 degrees but less than 180 degrees) or reflex (more than 180 degrees).

Watch the bitesize clips below all about angles.

<https://www.bbc.co.uk/bitesize/articles/zfbc3j6>

Challenge: Take photos of any angles you can find in your home. Label them as either acute, right angle, obtuse or reflex.

A **right angle** looks like the corner of a square or the edge of a book.

It is a perfect **90°**, which is often shown by a small square drawn in between the two lines.

An **obtuse angle** is an angle that is bigger than **90°** degrees, but doesn't reach a straight line at **180°**.

An **acute angle** is an angles that is less than 90°. This makes them smaller than a right angle.

A good way to remember this angle is to think that because it is small, it is "a cute" angle.

English

Conjunctions

We have looked at how we can extend our sentences with more than one clause by using a range of conjunctions such as; **and, but, so, or (coordinating conjunctions)** and **when, if, because, although (subordinating conjunctions)**

Watch the two BBC Bitesize clips below to remind yourself about conjunctions.

What is a coordinating conjunction?

<http://www.bbc.co.uk/guides/z9wvqhv>

What is a subordinating conjunction?

<https://www.bbc.co.uk/bitesize/topics/zhrd2p/articles/zqk37p3>

Use the image above to write a paragraph about what the children are doing. Make sure you extend your sentences using conjunctions. Underline the conjunctions you use.

Other

Use Purple mash to create your own animation!

Use '2animate' on Purple Mash to design your own storyboard pictures and run them together to make an animation. You could make up a simple story or retell one you already know. I look forward to seeing your completed animations!

Ongoing tasks

Please make sure you read your reading books.
